

Facilities development since 1992 has been directed toward modifications to internal floor plans. An updated Master Plan was prepared for the school in 1994 by architects John Brand and Co. John Brand continues to advise the school on current facilities needs. As was the case in 1923, the school council Facilities Committee of 1998 keeps the lines of communication open with the current local member of parliament in seeking government support for assistance with the Master Plan.
